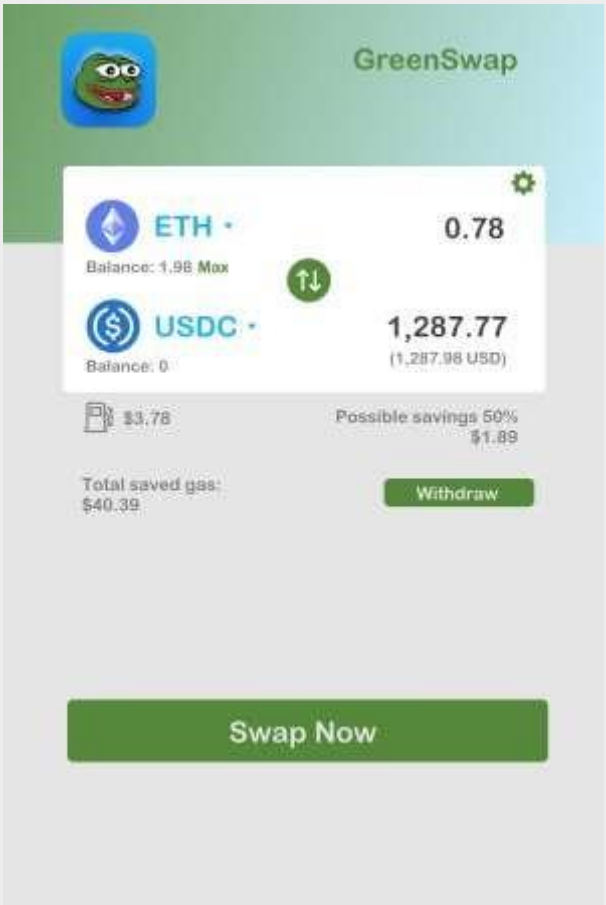
The GreenPaper

About The GreenSwap

The GreenSwap is a new DEX platform with a referral program, staking pools and the lowest platform transaction fees on the Ethereum chain.

The GreenSwap Version 1 is fully functional and will be released soon after launch. That’s correct, you will be able to add liquidity and start earning fee rewards from transactions. All stakers of PEPEG tokens will be able to earn a whopping 120% APR for the first month after the launch!



Connecting Your Wallet to GreenSwap

You will need to connect your crypto wallet to start your journey via the GreenSwap platform and experience all the lucrative features.
If you don’t have any crypto wallets, keep reading and create your first one following the detailed instructions from the GreenSwap team!
Wallets Available on GreenSwap.

MetaMask is a software-based cryptocurrency wallet used to interact with the Ethereum blockchain. It allows users to access their Ethereum wallet through a browser extension or mobile app, which can then be used to interact with decentralized applications. You can also download and use it on ETH Chain.

Guide To a Referral Program

GreenSwap DEX is one of the leading projects in the world of DeFi. Many excellent products have been released since the launch date. Nevertheless, GreenSwap is still growing and developing new features so our users can experience all the joys of owning crypto. One of the latest achievements is the Referral Program update with the launch of referral rewards from friends' swap commissions.

A Multi-type Referral Program is a unique GreenSwap product that allows users to make extra profit by inviting their friends to register via the referral link. You can do the same easily! Invite your friend and earn more crypto rewards through:

- Swaps
- Farms
- Launchpools

All your referral rewards will be sent to your referral balances in PEPEG tokens. All the fees will also be charged in PEPEG tokens.

Exchange — Earn up to 20% From Your Friend’s Swaps!

Swaps Referral Program indicates that users will get a specific commission reward every time their referrals make swaps on the GreenSwap platform. Rewards are sent out immediately following the referrals’ swaps. You will receive rewards according to the amount of PEPEG staked in the PEPEG Holder Pool.

Chain

The Swap Referral Program is exclusive and benefits users:

- Earn up to 20% from invited friend’s swaps
- A new method of gaining crypto through trading
- Obtaining exclusive experience on ETH

How To Earn on GreenSwap Farms?

Have you caught the thought of getting crypto in a way of passive income, little effort, and a few seconds? Such beneficial earnings can come true on GreenSwap Farms! In this article, you will find out useful information about farming with all the details and clear examples.

What is Farming on GreenSwap?

To begin with, **Farming** is a passive income opportunity that allows you to multiply crypto with **high APRs** by providing liquidity to a chosen pair of tokens.

Once you have provided the liquidity on GreenSwap you get **LP tokens** which can be later staked to **Enable Farm** and bring you **PEPEG rewards.** Let's dive into details and see the examples.

How To Start Earning on GreenSwap Farms?

Now, we will go over the step-by-step guide with the screenshots so you can gain a better understanding of farming on GreenSwap. The **ETH-PEPEG Farming Pair** will play a role as a sample for this guide.

Provide Liquidity, Stake LP tokens & Earn PEPEG

As you noticed there are two tokens in a farming pair. In order to enable any farming pair on GreenSwap, you need to have LP tokens that could be obtained via liquidity provision on the platform.

Getting Passive Income in GreenSwap Launchpools

GreenSwap Launchpools is a less resource-intensive alternative to mining. It lets users use their tokens to earn more tokens, for free. In simple terms, you lock your cryptocurrency to receive rewards.

There are two types of GreenSwap Launchpools where you can get passive income:

- Stake PEPEG Launchpools - allows users to stake (hold) PEPEG tokens to earn other top tokens for free.
- Stake Tokens Launchpools - allows users to earn PEPEG by staking (holding) other tokens on the platform.

Stake PEPEG Launchpools: Auto & Manual Compounding

Stake PEPEG Launchpools is a kind of Launchpools on GreenSwap where users can Stake PEPEG (Hold PEPEG) to Earn top tokens for free as a reward.

Stake PEPEG Launchpools can be divided in the following way:

✔ Auto-compounding - users' earned tokens will be compounded automatically every 5 minutes, without any additional actions from their side.

✔ Manual-compounding - users need to Harvest and/or Compound earned tokens by themselves.

✔ Holder Pool - launchpool on GreenSwap.org created to prioritise GreenSwap users in GreenSwap offers and for a new way of passive income via long-term investment.

Listing a Token on GreenSwap

If you are ready to list your token for the first time and introduce it to great trades — listing on the progressive GreenSwap platform is the right

decision for such a prospective implementation! This precise article is here to guide you through each step and represent the benefits of the token listing directly on GreenSwap.

Listing your token on the GreenSwap platform will broaden the horizons for your community — so your users can trade it with the lowest exchange fee of 0.2% on GreenSwap!

Distinctive Advantages of Token Listing on GreenSwap

The Lowest Exchange Fee—0.2% For Your Token

Firstly, your community will have an opportunity to exchange your listed token on GreenSwap with the lowest exchange fee of 0.2% in the whole DeFi space!

Up to a 50% Fee Return for Swaps with Your Token - If Listed by GreenSwap.

Secondly, users from all over the world can exchange your token with up to a 50% fee return after they make a swap. This feature comes into force when your token is added to the platform via the approved listing on GreenSwap Farms and Launchpools.

$PEPEG Token & Tokenomics

The PEPEG token is part of the unique GreenSwap DEX ecosystem, run by Frogs. PEPEG tokens provide holders with up to 50% exchange fee reimbursement when using GreenSwap DEX.

Name & Symbol: GreenSwap $PEPEG
Token supply: 900 000 000 $PEPEG

We will launch GreenSwap ($PEPEG) token on Ethereum, it will be listed on Uniswap.

$PEPEG will be FairLaunched which means 100% of whole PEPEG token supply goes to LP. No team tokens. Liquidity will be locked for 1 month and the contract renounced right after the launch.

To prevent whales and give a chance to the small investor, max purchases will be 2% of the total supply. If you try to buy a bunch of tokens at the launch and your transaction does not go through, that is the reason.

Tax

Buy and sell tax will be 3%. With the exception that right after the purchase, the sell tax will be higher but it will decrease in first 10min after launch and drop back to 3%. This is to avoid bots.

Most of the tax will be used for development and the rest will be used for marketing.

Roadmap

PHASE 1

Market analysis for usage and partnerships
$PEPEG team building and launching
Making a multi-platform active community
Software and UI planning/design
Website V1 development and release

PHASE 2

Whitepaper release
Website V2 launch
GreenSwap Version 1 testing and launch
Staking Opportunities

Marketing boosting

PHASE 3

GreenSwap final version update and release

Further exchange listings

More token swap support

$PEPEG token dApp integration

Community Engagement

More staking features

PHASE 4

Random rewards for stake users

DApp release

Gaining further CEX listings

More partnerships
